### PLEASE READ CAREFULLY BEFORE ORDERING

#### **GUARANTEE**

We guarantee to do our utmost to please our customers. We mean to send out only clean bulbs, free from disease and insects. Any claims or complaints in regard to bulbs should be sent soon after receiving the bulbs.

Of course if any bulbs are not true to name you can not make claims for that until after blooming. If anything goes wrong we always try to make a satisfactory settlement

with the customer. This is the only way that anyone can hope to build up a business. However we do not guarantee in any way **the bulbs you harvest** as unsatis-factory growing conditions or disease in the soil are beyond our control and we cannot be responsible for the crop you harvest except that if bulbs should not be true to name we will be glad to replace them or make a satisfactory settlement.

#### **ORDER EARLY**

Many varieties are sold out early. Order promptly to avoid disappointments. But late orders will receive careful attention. Important. Open all packages upon arrival. Keep in a cool, dry place.

#### TERMS

Our terms are Net Cash before shipment unless arranged otherwise. 25% will hold winter orders until March first. Orders not fully paid for will be sent C. O. D. for the balance at time of shipment to you.

#### GRATIS

All orders are filled with a liberal overcount. Gratis of varieties other than ordered are included in each customer's package. We strive to keep our prices as low as other reliable growers, and will gladly include overcount to cover any reasonable reduction after list is issued.

#### POSTAGE

All orders amounting to \$2.00 or over will be sent prepaid to any point in United States, if taken from our Prepaid List. On orders of less than \$2 add 15 cents postage. No single item accepted for less than 25 cents.

#### PLEASE READ CAREFULLY

All quotations are subject to previous sale. Due to increased costs of labor and all the other items of expense it has been necessary to increase our prices on most of the older varieties. However, our prices on most of the newer varieties have been reduced. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time.

## PLEASE MAKE MONEY ORDERS PAYABLE AT THE EXETER NEW HAMPSHIRE, POST OFFICE

#### -IMPORTANT-

Please Select Second and Third Choice, if Possible If no second choice is given we shall have to substitute as we are very short of help and must cut down on our correspondence

BULB SUPPLIES ARE EXTREMELY SHORT. WE WILL FILL YOUR ORDER IN ROTATION, SO PLEASE ORDER EARLY

All Stock Subject to Prior Sale. Obvious Errors in Prices are Cancelled.

SEABROOK

**NEW HAMPSHIRE** 

# A Message of Thanks

WE'RE NEVER TOO BUSY TO SAY "THANK YOU" to our patrons nor are we ever too busy to give complete and careful attention to everyone who comes to our gardens or orders by mail. But at the year-end the members of SEABROOK NURSERIES feel urged to express a very special "THANK YOU" to cover the whole year and to go to all the friends whose patronage and good will have meant so much to our success.

The picture on this catalogue cover will give all our many friends and patrons both far and near a glimpse of our large gladiolus field, and store house. It is the best advertisement we know of.

So we are sending you this sincere message of appreciation to let you know what is in our hearts. We invite you to visit our 20 acres of gladiolus, in bloom from July 15th until frost, located on U. S. Route 1, main highway to Portsmouth, N. H., six miles from Newburyport, Mass.

We regret that we were unable to fill late orders for a number of varieties last spring. Because of the shortage of gladiolus bulbs in the country the situation will be much more acute this coming spring. Therefore, we urge you to place your orders early.

Happy New Year to All,

#### SEABROOK NURSERIES,

Seabrook, N. H.

Mabel M. Rowe, Prop.

#### GLAD-I-O'-LUS:-

Please pronounce this wonderful flower right. The accent on the O'.

GLAD-I-O'-LUS and use the same form for both singular and plural. It hurts to hear one say GLADIOLA or GLADIOLIS!

#### **DO GLADS CHANGE COLOR?**

#### GLADIOLUS do NOT Change Color.

We have been asked this question hundreds of times. So many varieties divide or split. Suppose you plant twelve mixed bulbs, when you dig them you find you have about thirty bulbs. That is the reason you have more of one color than others. Many varieties do not divide, so you dig only one new bulb on the one you planted. And some not quite so strong just die out in the ground.

Of course glads grow older each year, you dig a new bulb not a young one. So it is best to keep adding more bulbs to your collection each year.

#### PLANTING TIME

Our planting time here is around APRIL to JUNE, so when ordering your bulbs to be sent to you at planting time, please state when planting time is in your locality. It will help us a lot.

#### WHEN YOU CHANGE YOUR ADDRESS

Please notify us so we can change our files. Also please give your old address at the same time. This will save us many catalogues and you will receive yours. THANK YOU.

#### C.O.D. ORDERS

Please do not ask us to send an order C.O.D. without your making a deposit on it. If it is a small order we shall have to ask for a deposit of at least a dollar. Larger C.O.D. orders should be accompanied by 25% of the value. We cannot send out any more C.O.D. orders without at least some deposit.

## CARE AND CULTURE OF GLADIOLUS

Select a sunny location away from the roots of trees and shrubs. Plant about six inches deep, having bulbs five inches apart.

Place bulbs in a well worked trench in staggered or zigzag row—. . . . and cover at first with about two inches of loam; when shoots'begin to appear, work balance of loam into the trench. At all times keep the soil loose. As an aid to producing larger blooms work in fertilizer around the plants when about a foot or more in height. At the time flower spikes appear, abundant watering is very beneficial.

Bulbs should be dug before leaves turn brown. Cut stock close to the bulb, spread them out to dry for two or three days in a sunny location and then place in an open shed or room for two weeks or more before storing them away in a cool dry place. Keep them spread out and not over three inches deep, give bulbs an occasional airing during the winter.

When cutting flowers, leave at least four leaves remaining on the plant. Positive injury to the blooming qualities of the bulbs for the following year will occur if this precaution is not heeded.

For cut flowers, cut the spike when first bud fully opens. The remaining buds will open nicely and give a longer period of bloom and greater enjoyment.

Remove wilted blossoms, change water and cut off a portion of the stems each day. These will then fit in a smaller vase.

### CONTROL OF THRIP

This insect can be carried on clothing, from one field to another by birds, high winds or in bouquets. Many bulbs are perfectly clean when planted, yet contact Thrip before season is over.

Thrip are black and cream, 1-16 inch long and live in the folding gladiolus leaves. Sometimes they can be detected by the silvery sheen on leaves although many times discovery is too late and the buds do not open as the insect has extracted all juice from them previously.

When plants are about three inches tall and thrip is found it is best to use a solution of the following as a weekly spray.

Use 1 pound Tartar Emetic, 4 pounds brown sugar to 25 gallons water for weekly spray. Tartar Emetic is a deadly poison to human beings. Tartar Emetic spray will not burn the foliage. Or use 3 gallons water, tbsp. of Tartar Emetic and 1-3 cup sugar for smaller amounts.

If discovery is made too late, it is best to cut tops off, about six inches from ground and burn them, allow bulbs to stay in ground until digging time. The above spray can be used on remaining stalk to kill anything which might be left.

Dig, clean and dry bulbs in usual manner. Place thoroughly dry bulbs in boxes. Sprinkle Napthalene Flakes over bulbs at the rate of 1 pound to 3000 bulbs or 1 ounce to 100 corms. Immediately cover receptacles with paper to confine fumes. Keep bulbs at temperature of about 60 degrees for three weeks. Store in dry place, uncovered, at 40-50 degrees for winter.

Warning—Treat stock in Fall, before roots swell or form at base. Napthalene adhering to bulbs may burn rootlets where they appear. Bulbs must be thoroughly dry before treating with Napthalene.

Bichloride of Mercury can be used to disinfect in proportion of 1 ounce to 8 gallons of water, or 10-15 grain tablets to gallon water, or if only a small amount of bulbs use 1-5 grain tablet to 1 pint water, soaking bulbs in solution for 3 hours. If many varieties to soak at the same time, place them in sugar, salt or net bags, labelling each variety, using little wood labels. A waterproof pencil can be used on the labels for marking. Do not use metal containers. This is done before planting.

#### NAPTHALENE FLAKES, 2 POUND PACKAGE, 65c, WITH BULB ORDERS This is enough for about 5,000 bulbs.

LYSOL DISINFECTANT.—As a dip for gladiolus bulbs, it has proven very satisfactory, 4 teaspoonfuls of Lysol mixed in 1 gallon of water, soaking the bulbs for 6 hours elminates thrip and stimulates root growth.

Although this method has not been tried by us, we have known of others, who have had success with Lysol. It may prove more satisfactory than the Mercury method.

# Gift Collections

Plan on presenting Gladiolus bulbs on Special Occasions, Birthday, Valentine, Easter, Mother's Day, Father's Day, or just any day before planting time so your relatives or friends may enjoy these lovely blooms this Summer, in their gardens. **These Selections are made up of large sized bulbs correctly labeled. Total** 

value of any single collection is over \$2.50.

#### **ROCKWELL'S BOOK ON GLADIOLUS**

Gladiolus, by F. F. Rockwell. Recommended as the "best brief guide on gladiolus growing." It tells how to plant, fertilize, and cultivate; how to grow from seed or bulb-lets; how to harvest and cure; how to handle for cut flowers and every other detail needed for success with this popular flower, 45 illustrations, 78 pages. Prepaid \$1.25.

#### SIZE IN BULBS

In Retail list, the large bulbs that we offer are  $1\frac{1}{4}$  inches and over in diameter: medium size are <sup>3</sup>/<sub>4</sub> inch up, and small bulbs <sup>3</sup>/<sub>8</sub> inch up. For Wholesale sizes see list. Beside the originator's name we have listed the approximate flowering season of

each variety as follows:

E—Early, under 70 days from planting. EM-Early Midseason, 70-80 days from planting. M—Midseason, from 80-90 days from planting. LM—Late Midseason, over 90 days from planting. M—Medium S-Small Blts. Bulblets. L—Large

**ON FAIR SIZED ORDERS, EXPRESS** is safest and best especially in the winter time; we advise express if you are situated so as to get free delivery by the express company.

#### **Identification of Gladiolus Blooms**

Do not send a single bloom inside a letter. When the letter goes thru the stamping machine at the post office all the moisture in the bloom is pressed out on the writing in the letter and is so blurred one can not make out its meaning and the crushed bloom so damaged it can not be identified. Just send a part of the stem with 3 or 4 buds on and leave enough stem for us to place in water for the bud to open. Do not send the very tip of the spike and do not put any wet paper or anything moist whatever in the package.

ROSY MORN Riley	2	.25	220		
Light coral rose, sometimes flecked. Opens 5-6 large, well placed blooms on a strong spike. Fine.	10	1.00	.80		

Dear Mrs. Rowe: I saw a Movie Short, on your activities at Seabrook, last week. Your business is my hobby. There is not a woman in America whom I envy as much as I do you. I should love to visit you, and your place sometime. I should fill my eyes, ears and mind with things I have always loved. Just a tribute to a worthy woman of America.

MRS. McKAMY, Dallas, Texas.

### VICTORY SPECIAL

10 Red, 10 White, 10 Blue—30 Lg. Bulbs \$2.00.

Colors Kept Separate or Mixed as You Prefer.

## LABELS

Everyone who grows bulbs under name will want labels. There are many different kinds on the market but think the best cheap label is a painted wooden one. However, in using the wooden labels they really should have a coat of varnish after the name is written, otherwise the paint will weather off taking the name with it.  $12 \times 11-8$  25 for 50 cents, 100 for \$1.80.

Am enclosing another order, and I desire your White Gold also Corona and Greta Garbo. I already have some of your gorgeous bulbs, which always create a sensation.

MRS. WOOD, Peewe Valley, Ky.

Ð

# Small Decorations

As we have so many calls for the smaller size Glads, to be used for Table Decorations, and in small homes, we have decided to list a few separate from the others. These take in all colors and shapes in the very small dainty varieties. We have had these listed right along but for some reason our customers could not pick them out and you will find them in their places here in the Catalog, showing description and prices.

BABY BETTY (Kinnon) Cream and light pink.
BETTY BROWN EYES (Briggs) Salmon with brown blotch.
BETTY CO-ED (Briggs) Soft lafrance pink.
BRIGHTSIDE (Prestgard) Talisman rose shade.
DAINTY QUEEN (Mc Kibbon) Light pink laciniated very lovely.
DEE (Rowe) Tall clear bright orange.
GOLDEN POPPY (Prestgard) Deep yellow.
ORANGE BUTTERFLY (Salbach) Dusky orange.
PATRICIA CARTER (Kunderd) Clear rich pink.
QUEEN BREMEN (Zimmer) Deep lavender rose.
ROSE MIST (Fischer) Red-edged silver.
SEAFOAM (Vaughan) Tall slender stem, white.

SWEETHEART (Prestgard) Pale pink edged with deep pink.

TALISMAN (Gruellmans) Canary yellow, flushed apricot.

THE ORCHID (Sprague) Laciniated lavender resembling an orchid.

WHITE BUTTERFLY (Kunderd) Pure white, many open.

## UNLABELED COLLECTIONS AT PREPAID PRICES

We have long been noted for the excellence of our mixtures, stating with reasonable assurance, that there are but few growers able to offer as varied and choice assortments such as we assemble. The bulbs are all 1¼ inches and over, and not the medium bulbs 1 inch or smaller, such as many offer at even greater prices. If you want medium bulbs, pay only what you should.

### GARDEN MIXTURE

Composing many types and sizes of fine varieties, all colors. Splendid for a gorgeous garden display or flowers for cutting. \$3.50 per hundred, fifty for \$1.75. Medium bulbs \$2.50 per hundred, fifty for \$1.25.

### **PRIMULINUS MIXTURE**

For daintiness and quality, there is nothing that can equal our Primulinus Hybrids. For table or interior decorating, they are unsurpassed. \$3.00 per hundred, fifty for \$1.50. Medium bulbs \$1.50 per hundred, 50 for 75c.

#### SEABROOK MIXTURE

#### **Exhibition** Types

Made up of a large number of very choice varieties of superior merit. If bought under name the bulbs would cost many times the price asked. \$6.00 per hundred, \$3.00 for fifty. Medium bulbs \$3.50 per hundred, \$1.75 for 50.

#### **DELUXE COLLECTION**

To satisfy the demand for a mixture containing the choicest varieties that it would be possible to buy for a reasonable price, we offer this collection with the assurance given that you will be agreeably surprised at the wonderful value. Every bulb that is put into this collection is from a variety of the finest exhibition type and collection well balanced as to colors. \$9.00 per hundred, \$4.50 for fifty, \$2.25 for twenty-five. Medium bulbs, \$5.00 per hundred. \$2.50 for 50.

#### **COLOR COLLECTION**

Ten large bulbs, each COLOR labeled, 100 bulbs in all, Yellow, Red, Pink, Cream, Salmon, Lavender, White, Purple, Orange and Old Rose. These are put up in the same two grades as above, \$6.00 and \$9.00. We can assemble these also in packages of 5 each at half price.

#### IRIS

We have numerous varieites not labeled that can only be sold in mixtures. All good sorts in varied collection, \$1.00 dozen. Also lots of single Colors for \$1. dozen. Buy a Yellow, White, Orchid or Mahogany collection, also dark blue dwarf for borders. Transplanting time best in August to October.

#### **IMPORTANT**

Read carefully on Postage inside front cover.

## DDT AS A CONTROL FOR GLADIOLUS THRIPS

#### By M. D. FARRAR, Research Entomologist Illinois Natural History Survey

(Prepared at the request of the Illinois G. S.)

The new war insecticide DDT (dichloro - diphenyl - trichloroethane) has found a place in the control of Gladiolus thrips on stored Gladiolus corms. Early work indicated this thrips was very susceptible to DDT. Later tests show those findings to be correct.

The new method has its greatest use where corms are stored at temperatures that permit Gladiolus thrips to breed on corms over winter. Many growers are forced to store their corms at such temperatures favorable to the thrips. For these growers, DDT will protect their stock from damage without the labor of bagging, airing, or special cleaning of the stock. Where corms can be stored at cold temperatures unfavorable to development of thrips, use of DDT dust may not be of great value. In Illinois, experiments carried on during the last two years indicate that DDT will completely handle the thrips problem on stored corms. Corms should be dried before treatment, but they need not be cleaned.

The powder containing DDT can be scattered onto the corms at any time after they are thoroughly dry. Treating after rough cleaning may be most satisfactory, although many growers may prefer to clean stock first and then treat it before storing the cleaned corms until spring.

The dust should be worked into the trays sufficiently to coat all corms. For corms stored in bags, a small amount of dust may be added and the bag shaken to distribute the dust.

Treated corms need not be disturbed until planting time. The exposure to DDT over winter in storage apparently has no adverse effects on either the keeping quality or germination after planting. Treated corms are pleasant to handle as a result of the talcum used as carrier for the DDT.

Table 1 gives the Illinois results of tests in 1945. The corms used were dried as they came from the field and not cleaned in any way until just before planting. The dusts were applied at the rate of 1 ounce of dust to 40 pounds (1 bushel) of dry corms. In these tests dusts containing between 1 and 10 per cent of DDT completely prevented any injury to the corms by thrips. These tests indicate that a dust which contained more than 1 per cent DDT would be satisfactory for this purpose. A wide variety of commercial dusts containing 1 to 3 per cent DDT are now on the market and are available from dealers in insecticides.

The amount of dust applied is not particularly important provided sufficient dust is used to coat the dry corms. Excess dust can be shaken out and used on additional stock.

*Caution:* Liquid sprays containing DDT should not be used on corms until tests indicate that they do not cause injury.

## Notes on the Life History of Gladiolus Thrips

#### Taeniothrips Simplex (Morison)

In the northern states, where corms are harvested and stored during the cold months, Gladiolus thrips apparently do not survive out of doors. Leaving tops in the field, exposed to the weather, will cause all thrips on the foliage to die. Piles of foliage or clearing shucks should be scattered or burned to insure the destruction of all thrips attempting to over-winter in Gladiolus trash piles.

Thrips carried on the corms to storage will breed at temperatures above  $50^{\circ}$  F. Unless treated, corms stored in basements where winter temperatures are generally  $60^{\circ}$  F, or above are almost sure to be injured by thrips before spring. Several generations may develop in warm basements during the winter months. Feeding of thrips on the corms will cause discolored, hardened areas on the corms. Severely injured corms dry abnormally, resulting in shrunken, misshapen planting stock. Such stock is slow to start growth and may not produce satisfactory spikes.
